

Sewerage & Water Treatment Plant Operator

Blomfield Environmental Pty Ltd

Fulltime position

Qualifications: Must have Cert III in Sewerage and Water Operations

Experience is required:

- High level of knowledge and experience in sewage and water treatment plant operations.
- Apply this knowledge to an array of plants.
- Knowledge of mechanical & electrical maintenance.
- Must understand process control and process adjustment.
- Should be able to exercise basic fitter operations in pump removal and service.
- Additional experience in UF and RO systems will be highly considered but this not essential.

Position Location

- Located west of Mackay in the Bowen Basin Coalfields.
- The applicant would ideally live or move to the general area (Mackay)
- This is not a fly in/fly out position.

Hours of Work

- 4-5 days per week, min 38 hours
- Only weekends on holiday relief

This is an additional position being created in the company. The applicant will work in rostered locations at a number of sites providing a variety of conditions and challenges. You will self-manage and be the company representative on these sites.

As part of the team at Blomfield Environmental, you will be offered accommodation, meals, mobile phone and a fully equipped company vehicle (tools and monitoring equipment) when on-site. The position offers a competitive wage and condition package with flexible rosters. The position is working in the coal fields and you will be required to complete inductions, drug screens and medicals prior to commencement.
