

## WATER & SEWER MANAGER

- Salary from \$97,700 plus housing and leaseback vehicle
- 9 day fortnight (35 hour week)
- \$15m Water Treatment Plant construction project

*In this role you will lead the development and management of quality systems relating to both operational and regulatory compliance within Water and Sewer.*

Cobar is a flourishing country town built around the thriving mining and pastoral industries. Mining commenced here in the 1870s, and today, the town is an important source of copper, lead, silver, zinc and gold. With direct flights available to and from Sydney, Cobar remains easily accessible to the city.

Cobar Shire Council is seeking to appoint a Water & Sewer Manager with demonstrated experience in strategic planning, design, documentation and management of water and wastewater, including major infrastructure upgrades, water storage, water treatment, pumping and piping projects.

Council will be commencing the construction of a new \$15m water treatment plant, which is currently out for tender. You will play a major role in ensuring that this project meets the delivery and quality expectations of Council.

You will have the responsibility for providing professional engineering advice and support to Council and senior management along with contributing to team member development through mentoring and the provision of technical leadership.

Applications must be made on Council's application form and all selection criteria must be addressed in a separate document to be considered, together with a copy of your resume. Information packages are available from Council's website at [www.cobar.nsw.gov.au](http://www.cobar.nsw.gov.au).

**Enquiries:** Director of Engineering Services, Stephen Taylor on 02 6836 5888.

**Applications close 4pm Monday 6<sup>th</sup> March 2017.**
