

# Process Controller

## Townsville

TRILITY is an established industry leader, solely dedicated in the delivery of water, wastewater and reuse solutions across Australia's municipal and industrial sectors. This leadership draws on more than 20 years' experience of providing high-quality solutions for our public and private sector clients including financing, design and construction, operations and maintenance, asset management and utility services. An Australian company with the might of Mitsubishi Corporation as its major shareholder, TRILITY has a growing footprint in every corner of the nation. As such, our capabilities span the full life cycle of water, delivering services to millions of Australians every day.

### Role Description

As a Process Controller you will be accountable for the performance of the treatment plants to the required standards.

Your duties will cover all aspects of plant operations and will extend to process control, laboratory testing and maintenance of process equipment and other assets.

You will be capable of working on your own initiative and assuming total responsibility for plant operation.

Whilst the majority of work is day based, the role requires participation in an on-call roster covering remote operations duties and plant attendance after hours and on weekends as necessary.

You will be expected to make and implement decisions relating to treatment and processes and in so doing, comply with all legislation, regulations, Company and site procedures or instructions as documented.

The position will be full time on a permanent basis, based in Townsville.

### What We Are Looking For:

- Experience in operation and maintenance of water, wastewater or similar production facilities. Operating experience using SCADA & computer based plant control systems is an advantage.
- A trade background will be well regarded
- Familiarity in use of PC's and a range of software
- Ability to use SAP maintenance & purchasing software systems will be viewed favourably
- Possess a high level of maturity, with the ability to make decisions relating to the availability and quality of the public water supply with minimal direction and guidance
- Possess effective problem solving skills & sound judgement in relation to plant operational issues
- Be flexible with the ability to adapt to change and rapidly apply new knowledge
- Be a reliable team member, and be an effective communicator with good interpersonal skills
- Ability to effectively manage multiple tasks at the same time
- Be able to work independently
- Have a current drivers licence
