

Practical Guide to the Operation & Optimisation of Microfiltration & Ultrafiltration Membrane Processes

Kathy Northcott, Greg Creek and Peter Mosse

Contents

1. Hazards, Risks and Control Points	4
• Hazards and Drinking Water	4
• Pathogens are the Main Hazards in Drinking Water	5
• Other Hazards.....	8
• Control Points.....	9
• Critical Limits and Target Criteria	10
• Corrective Actions	11
• Responsibilities	12
2. Membranes and Public Health	13
• Operating Criteria and Performance Parameters.....	15
3. Introduction to Membranes	17
• Membranes and Water Treatment.....	17
• Basic Membrane Terminology	17
• Membrane Filtration Processes.....	19
• How Membranes Work.....	20
• Membrane Fouling	21
• Membrane Materials.....	21
◦ Hydrophobicity	22
◦ Oxidant Tolerance.....	23
• Flow Configurations.....	23
• Types of Membrane Systems.....	26
• Membrane Pre-treatment	30
• Membrane Resistance	31
• Flux.....	31
◦ Normalised Flux (Correction for Viscosity).....	32
• Transmembrane Pressure and Membrane Permeability	33
4. Optimisation of Membrane Filtration Systems	34
• 1. Know Your Process	34
• 2. Know Your Plant	34
• 3. Feedwater Quality and Pre-treatment	35
◦ Prefiltration.....	35
◦ Feedwater Coagulation.....	37
◦ Use of Polymers.....	38
• 4. Membrane Integrity	38
• 5. Membrane Fouling	39
• 6. Flux.....	40
• 7. Backwashing and Chemical Cleaning	40
• 8. Inspections of Membrane Elements	40
• 9. Calibrate Gauges, Meters and Associated Instrumentation	42
• 10. Reduce the Risks Associated with Washwater Recycling	43
5. Membrane Cleaning	44
• Backwashing of Hollow Fibre Membranes	44
• Backwashing of Immersed Membranes	46
• Chemical Cleaning	47
◦ 1. Chemically Enhanced Backwash (CEB)	47
◦ 2. Chemical Clean-in-Place (CIP)	47
• Monitoring the Effectiveness of Cleaning	50
• Management of Chemical Sludge	51

6. Membrane Maintenance.....	52
• Record Keeping.....	56
• Using Maintenance Statistics	56
• Storage and Preservation of Membranes.....	57
• Membrane Autopsies	58
• Trouble Shooting	63
7. Membrane Replacements	64
• When to Change out Membranes	64
• Preparation for Changing out Membranes	65
• Decommissioning and Dismantling	67
• Replacement of Membrane System Components.....	68
• Recommissioning the Membrane System	69
8. Nanofiltration and Reverse Osmosis.....	70
• Comparison of NF and RO to MF and UF	70
◦ Sizes of Particles Removed	70
◦ Operating Pressures	70
◦ How NF and RO Membranes Work	71
◦ Diffusion and Osmosis	71
◦ Osmotic Pressure and Reverse Osmosis	72
◦ Actual Membrane Performance	72
• The RO System. Membrane Elements, Stages and Arrays	73
◦ Stages and Recoveries.....	74
◦ Importance of Pre-Treatment.....	76
◦ Silt Density Index (SDI).....	77
◦ Integrity Testing for RO Membranes	78
◦ Post Treatment	79
◦ Causes of Membrane Failure.....	80
◦ Energy Recovery	81
◦ Concentrate Management	81
◦ Pressure Vessel Safety	82
• Terminology	82
9. Closing Words	83
• Further Reading	83
Case Study in Membrane Troubleshooting.....	84
• 1. Impacts of Raw Water Quality Changes on Microfiltration Plants	84
◦ Monitoring Membrane Performance	86
◦ Membrane Cleaning Trials.....	87
◦ Review of Membrane Condition and Performance	88
◦ Follow-up Autopsies.....	88
◦ Conclusions	89
• 2. Importance of Pre-Treatment	90
