

Practical Guide to the Operation and Optimisation of Media Filters

SECOND EDITION

Peter Mosse and Bruce Murray

Foreword

Acknowledgements

General Introduction

Chapter 1	Hazards, Risks And Control Points	6
	• Hazards And Drinking Water	6
	• Pathogens Are The Main Hazards In Drinking Water	6
	• Other Hazards	9
	• Control Points	10
	• Critical Limits And Target Criteria	11
	• Corrective Actions, Incident And Emergency Management Plans	12
	• Monitoring	13
	• Responsibilities	13
Chapter 2	Filtration	14
	• Filtration And Public Health	14
	• The Filtration Process	15
	• Operating Criteria And Performance Parameters	16
Chapter 3	Filter Optimisation	18
	1. Collect Relevant Drawings And Manuals	18
	2. Establish Filter Run Times (Prepare A Filter Run Profile)	19
	3. Establish The Filter Backwash Time	21
	4. Observe Filter Operation And Backwashes Regularly	22
	5. Measure Rates	23
	6. Inspect The Media	24
	a. Periodically Inspect The Surface Of A Filter After A Backwash	27
	b. Deep Bed Investigations	27
	c. Refilling A Filter After Draining	28
	d. Use Fine Mesh Filters To Determine Which Filter May Be Damaged	28
	e. Some Examples Of Problems With Filters	29
	7. Bed Fluidity And Bed Expansion	31
	8. Inspect The Plenum Space Or Filtered Water Channel	34
	9. Keep Filter Walls And Launderers Clean	35
	10. Measure Metal Concentrations In The Filtered Water:	36
	11. Minimise Particle Breakthrough	36
	12. Calibrate Differential Pressure Gauges, Flow Meters And Turbidity Meters	39
	13. Minimise The Filter Ripening Period	39
	14. Reduce The Risks Associated With Wastewater Recycling	40
	15. Optimise Chemical Dosing	41
	• Storing Filters Offline	42
	◦ Reduction Of Plant Flow	42
	◦ Cycling Filters	43
	◦ Long Term Storage Of Filters	43
	◦ Dry Storage	44
	◦ Wet Storage	44
	◦ Returning A Filter To Storage	45
	• Pressure Or Enclosed Filters	45

Chapter 4	Filter Backwashing	47
Chapter 5	Monitoring Filter Function	51
	• Short Term Monitoring Of Filter Function: SCADA Trends.....	51
	• Long Term Monitoring Of Filter Function	52
	• Other Measures.....	55
Chapter 6	Fixing Filters	56
	• Repeated Backwashing.....	57
	• Surface Scraping	57
	• Jet Lancing.....	58
	• Caustic Washing.....	58
	• Chlorine Treatment.....	58
	• Managing Media Downstream Of The Filters	59
	• Topping Up Filter Media	60
Chapter 7	Filter Media	61
	• Media Sieving.....	61
	◦ Effective Size.....	63
	◦ Uniformity Coefficient	63
	• Physical Properties.....	63
	◦ Filter Coal.....	63
	◦ Filter Sand For Dual Or Monomedia Filters.....	64
	◦ Coarse Sand And Filter Gravel.....	64
	◦ Granular Activated Carbon	65
	• Filter Media Selection And Design	66
	• Filter Media Life.....	67
Chapter 8	Rebuilding Filters	68
	• Getting Started	68
	• Dismantling The Filter	70
	• Remove All Traces Of Sand	72
	• Replacing Nozzles.....	72
	• Inspecting Nozzles	73
	• Checking The Air Scour Pattern	74
	• Rebuilding A Filter	75
	• Relaying The Filter Media	76
	• Recommissioning The Filter	78
Chapter 9	Closing Words	79
References		80
Appendices		
Appendix 1	Types of Filters	81
Appendix 2	Calculation Of Filtration Rates And Backwash Rates.....	83
Appendix 3	Filter Entry Hazard Identification And Risk Assessment	85
Appendix 4	Example Filter Entry Permit	86
Appendix 5	Filter Inspection Requirements	88
Appendix 6	Filter Inspection And Assessment Procedure	89
Appendix 7	Filter Inspection Record Sheets.....	93
