

# Practical Guide to the Optimisation of Chemical Dosing, Coagulation, Flocculation and Clarification

SECOND EDITION

Bruce Murray and Peter Mosse

**AUSTRALIAN WATER**  
ASSOCIATION

**WATER**  
DIRECTORATE

International Centre of Excellence in  
Water Resources Management

## Foreword

## Acknowledgements

## General Introduction

### Chapter 1 Hazards, Risks And Control Points

- Hazards And Drinking Water .....7
- Pathogens Are The Main Hazards In Drinking Water .....7
- Other Hazards.....10
- Control Points .....11
- Critical Limits And Target Criteria.....12
- Corrective Actions, Incident And Emergency Management Plans.....13
- Monitoring .....14
- Responsibilities .....14

### Chapter 2 Coagulation, Flocculation And Clarification

- The Importance Of Coagulation, Flocculation And Clarification .....15
- Coagulation .....16
  - Mixing.....17
  - Coagulation Or “Dosed Water” pH .....19
  - Alkalinity .....20
- Enhanced Coagulation .....21
- Flocculation .....23

### Chapter 3 Coagulants And Polymers

- Coagulants.....26
  - Basicity .....26
  - Specific Gravity .....26
  - Aluminium Sulphate (Alum) .....27
  - Aluminium Chlorohydrate (ACH).....28
  - Polyaluminium Chloride (PACl) .....28
  - Ferric Chloride .....28
  - Ferric Sulfate .....28
  - Sodium Aluminate.....29
  - PolyDADMAC .....29
- Which Coagulant To Use.....32
- Coagulation, Flocculation And Filtration Aids.....34
  - Which Polymer.....35
  - Polymer Dose Rates.....35
  - Making Up Polymers.....36
  - Dosing.....37
- Chemical Dosing Sequences .....38

<b>Chapter 4</b>	<b>Chemical Quality Assurance</b>	
	• Risks Associated With Drinking Water Chemicals .....	39
	◦ Managing Risks .....	40
	• Specifications For Drinking Water Treatment Chemicals .....	42
	• Contaminant Levels .....	42
	• Maximum Dose Rates .....	45
<b>Chapter 5</b>	<b>Jar Testing</b>	
	• Jar Testing .....	46
	◦ Jar Test Equipment .....	48
	◦ Stock Jar Testing Solutions .....	48
	◦ Basic Jar Testing Procedure .....	50
	• Modifications Of The Basic Jar Test .....	52
	◦ Enhanced Coagulation .....	52
	◦ Direct And Contact Filtration .....	52
	◦ Dissolved Air Flotation (DAF) .....	52
	◦ Powdered Activated Carbon (PAC) .....	53
	• Procedure For pH Correction For Jar Testing .....	53
	• Manganese Jar Testing .....	54
<b>Chapter 6</b>	<b>Chemical Dosing Calculations</b>	
	• Step 1. Calculate The Concentration Of The Active Ingredient .....	55
	• Step 2. Calculate The Dose Rate In The Plant .....	56
	◦ Liquid Chemicals .....	57
	• An Alternative Method For Expressing Liquid Dose Rates .....	57
	• Actual Dose Rates .....	58
	• Polymeric Coagulants .....	59
<b>Chapter 7</b>	<b>Clarification</b>	
	• Clarifiers .....	60
	• Settling Clarifiers .....	61
	◦ Sedimentation Tanks And Settling Clarifiers .....	61
	◦ Shallow Depth Settling Clarifiers (High Rate Settlers) .....	63
	◦ Upflow Clarifiers .....	64
	◦ Adsorption Clarifiers .....	67
	◦ Dissolved Air Flotation .....	68
	• Clarifier Loading Rates .....	71
	• Sludge Management And Removal .....	71
	◦ Sludge Blow Down Or Desludge .....	72
	• Re-Establishment Of Sludge Blanket In An Upflow Clarifier .....	73
	• Comparison Of Clarifier Performance .....	74
	• Clarifier Operation And Trouble Shooting .....	75
	◦ Operational Variables .....	75
	◦ Trouble Shooting Guide .....	75

<b>Chapter 8</b>	<b>Optimisation of Coagulation, Flocculation and Clarification</b>	
	• Operating Criteria And Performance Parameters For Coagulation And Flocculation.....	78
	• Operating Criteria And Performance Parameters For Clarification .....	78
	• 1. Optimise Coagulation .....	79
	• 2. Ensure Coagulant Is Added After Any Return Streams.....	80
	• 3. Optimise Coagulant Dosing Point.....	80
	• 4. Monitor Coagulation pH.....	81
	• 5. Optimise Flocculation .....	81
	• 6. Determine Coagulation And Flocculation Times .....	82
	• 7. Minimise The Effect Of Weather And Temperature .....	82
	• 8. Operate Flocculation Systems Continuously.....	84
	• 9. Observe And Monitor Flocculation And Clarifier Operation .....	84
	• 10. Monitor Sludge Blanket Depth.....	85
	• 11. Control Algae .....	86
	• 12. Keep Flocculation Tanks And Clarifiers Clean.....	87
	• 13. Check And Maintain DAF Distribution Systems .....	88
	• 14. Monitor Residual Coagulant Levels.....	88
	• 15. Record And Use Past Experience (Look Up Tables).....	89
	• 16. Other Methods For Controlling Coagulant Dose .....	89
<b>Chapter 9</b>	<b>Other Chemical Processes</b>	
	• 1. Water Softening.....	91
	◦ Lime Soda (Chemical) Softening.....	91
	◦ Mixing .....	93
	◦ Softening And Conventional Clarification .....	94
	◦ Solids Management.....	95
	◦ Lime Crystallisation .....	95
	◦ Sequestering .....	96
	• 2. Removal Of Manganese By Potassium Permanganate .....	96
	◦ pH And Alkalinity .....	97
	◦ Temperature .....	97
	◦ NOM And Sulfide.....	97
	◦ Reaction Time .....	98
	◦ Mixing Of $\text{KMnO}_4$ .....	98
	◦ Dosing Control.....	98
<b>Chapter 10</b>	<b>Closing Words</b> .....	99
<b>References</b> .....		99
<b>Appendices</b>		
Appendix 1	Mixing .....	100
Appendix 2	Some Polymers Used In Water Treatment.....	103
Appendix 3	Example Product Specifications For Alum .....	106
Appendix 4	Example Jar Test Record Sheet.....	107
Appendix 5	An Alternative Method For Expressing Alum Concentrations.....	108
Appendix 6	Floc Size Chart.....	108
